ENCLOSURES (NO. & TYPE)

REMARKS

50X1-HUM

50X1-HUM

1. The Albrecht and Wilhelm Kasernes, Vienna, were still mainly occupied by motor transport units on 8 March 1950.
2. Three AT guns were observed for the first time in a section of the Albrecht Kaserne yard which had recently been separated from the rest of the kaserne area by a wire fence. Two of the guns had a split-trail carriage, protective shield with movable lower section extending below the axle, 2.5 to 3-meter barrel of 80 to 100-mm caliber, cylindrical muzzle brake, whole disk wheels with pneumatic tires and a cylinder one meter long above and below the barrel. The third gun differed from these guns only by having a barrel somewhat slimmer and 30 to 50 centimeters longer (muzzle brake?). Truck with box-like superstructure were seen in the separated section of the kaserne yard.
3. Tank trucks were seen in the fuel dump opposite the Albrecht Kaserne.
